Press Release

Indiana Precision Grinding (IPG) awarded quality certification from Messier-Dowty

Certification enables Indiana company the opportunity to perform critical precision grinding operations of close tolerance features on landing gear components for the 787 Dreamliner aircraft.

Indianapolis, IN, October 1, 2007: Messier-Dowty, the world leader in the manufacture of landing gear systems, presented IPG with their Certificate of Approval on August 29, 2007. The certificate verifies that IPG's Quality Management System meets the quality requirements to perform work on landing gear components, including those used on the new Boeing 787 Dreamliner. Messier-Dowty officials visited IPG last year and performed a quality audit on the facility. The quality system was approved from this audit.

"This achievement is further evidence for our customers and partners that IPG is focused on the key characteristics of aerospace products and is fully committed to meeting our customer's requirements. Our Quality Management System helps create the systematic framework for our organization that is necessary to help them (our customers and partners) develop and market products and services that are of the highest quality. The leadership at IPG has made it a priority to continually strive for leading edge quality practices and to manage our business with a focus on quality", says owner Dave Cox.

IPG is currently ISO 9001:2000 registered and will be announcing the completion of their AS9100 registration in November of this year. IPG has also received the "Qualified Source Status" certification from Hamilton Sundstrand and "Dock to Stock" certification from Cook Urological.

For Release 9 a.m. EST, October 1, 2007

Indiana Precision Grinding (IPG) was established in 1975 and today is recognized within the industry as one of the premier precision grinding job shops in the mid-west. IPG specializes in providing precision solutions. Core services include, but are not limited to, Process Engineering, Precision Grinding Services, Supplemental Production Support, and On-Demand Backup Support. Our current specialties within these service offerings include CNC cylindrical OD/ID, Centerless, Double Disk and Surface grinding.

IPG currently serve over 150 active customers across multiple industries and boasts the fact that eighty percent of their customers have been doing business with them for over ten years. For more information visit www.indianaprecisiongrinding.com.

Messier-Dowty, a SAFRAN Group company, is the world leader in the design, development, manufacture and support of landing gear systems. Messier-Dowty landing gear are in service on more than 19,500 aircraft making over 35,000 landings every day. Messier-Dowty is the only approved landing gear supplier for the Boeing 787 Dreamliner and has the exclusive design rights for this landing gear.
